

MEMORANDUM

TO: Daughters of Sarah Nursing & Rehabilitation Center Families and Residents
FROM: Mark L. Koblenz, CEO
Daughters of Sarah Senior Community
DATE: February 10, 2021
RE: COVID Update

We would like to inform you that we have completed another round of testing Nursing & Rehabilitation Center residents for the Coronavirus. We are pleased to note that none of the test results were positive.

At the same time, we regret to note that we have had 2 new staff members test positive for the virus. These individuals have begun their quarantine period at home.

Our second vaccine clinic proceeded smoothly. Those residents and staff members who received a first dose have now also received their second dose of the Pfizer vaccine. In addition, a number of people who were unable to receive the first dose at the initial clinic were able to get their first dose.

Moreover, our pharmacy partner has agreed to provide in essence a third vaccine clinic on February 17th, 2021. At that time, the pharmacy will give the second dose to those who just received their first dose; in addition, they will provide first doses to anyone who was unable to get the shot at any of our earlier clinics.

Our staff remains available to facilitate video chats or window visits with you. Please do not hesitate to contact your loved one's social worker to make arrangements.

Thank you again for the ongoing trust and confidence you have displayed for Daughters of Sarah.
