

MEMORANDUM

TO: Residents, Families and Friends
FROM: Mark L. Koblenz, CEO
DATE: May 3, 2022
RE: Campus Update

We are contacting you today to share an update on campus events at the Daughters of Sarah Nursing & Rehabilitation Center.

We are excited to note that this coming Sunday marks Mothers' Day, and we extend best wishes to all of our mothers. While we are still constrained as to the extent of activities we can schedule, we will be recognizing all of our resident mothers on Sunday with flowers. We welcome you to visit with your loved ones to celebrate the day.

As a result of our testing protocols over the past day, we have learned of two additional residents who have tested positive for the Coronavirus – one on the Gold Unit and one on MEU. This brings our current total of residents to three. We have also identified 6 new staff members who have also tested positive. As the week progresses, we will continue with testing as per our procedures.

We will also maintain our monitoring of the potential symptom situation of the residents, and have implemented isolation and infection control protocols for the infected residents.

Please be aware that, in the meantime, there continues to be no change in our visitation procedures as a result of this circumstance.

Should you have any questions, please do not hesitate to contact your loved one's social worker.
